

Occupied FTE

This section displays All Occupied FTE for the selected School. Data shown is largely from UCPATH. The current UCPATH data pull date is always displayed in the top header as "UCP YYYY-MM-DD". Unreconciled or new changes may not be reflected.

Sort - The rows are sorted by the Department Name then by the Faculty last name. Use the Control-F search function for any data on screen.

Hover Notes - Hover the cursor over headers with a dotted underline to view additional notes.

FTE ID

Clicking the FTE ID number will open its 'FTE ID Information' card.

FTE

When the FTE column displays the data in **red**, it means this number does not match UCPATH. This is common and usually due to UCPATH FTE payroll protocol.

The FTE appointment structure does not necessarily reflect salary support structure. FTE Claims, UCPATH and school records should be considered for any appointment structure involving joint appointments, multiple areas, loaned FTE, or partner hires.

Not Active Status

This field displays the UCPATH Employee Status Codes which are defined in the Utilities tab. When the field is blank, the status is 'Active'.

Annual Rate

The Registry reflects the annual rate per UCPATH, including several pay components that are not included in Appointment and Separation transactions (i.e., UCDEC5, UCGCYN, or any other Negotiated Salary Program (NSP)). The salary value is included for general reference only. For Occupied positions, the Registry is focused on accurately tracking the FTE structure.
